

## Dublin Landforms:

Do this as a directed draw.

- Start with the Sierra Nevada Mountains. Discuss how California receives 85% of their water from the mountains and how rivers form from melted snow and rainfall there.
- Add the foothills and the Sacramento River.
- Add the delta.
- Add our local valley features:
- Mt. Diablo
- Oakland Hills and Altamont Pass
- Dublin Grade
- Local bodies of water including Lake Del Valle, Shadow Cliffs, etc.
- Local creeks: Alamo Creek, Tassajara Creek, and Arroyo De La Laguna which flows to the San Francisco Bay.
- The bay flows into the Pacific Ocean.
