

## Dublin's Seasons

Brainstorm the different weather and climate patterns for each season. Write a brief description of each in the square.

Draw some typical changes you would see in each season here in Dublin, for example, the wildflowers on the hills in spring and brown hills in summer.

Add the sun's position in the sky for each season. Example: low on the horizon for winter and high in the sky for summer to reinforce the concept of the short and long days according to the season.
